

Helping Santa Fe County residents plug in to affordable solar power

why go solar?

- Solar electric systems cost 60% less today than they did ten years ago!
- A 26% federal tax credit is available for systems completed by December 31, 2020—hurry, this program ends soon!
- A new 10% New Mexico state tax credit is also available
- Your electricity will come from a clean, nonpolluting source
- Solar will reduce or nearly eliminate your energy utility bills
- Solar panels add significant resale value to your home or business
- Solar energy production uses 99.5% less water than conventional power
- When there's a huge solar-energy spill, it's not toxic. It's just called a "nice day!"

we're here to help!

Santa Fe County Sustainability offers a **FREE, IMPARTIAL CONSULTATION** for residents who want to go solar. We can:

- Help demystify the process of switching to solar
- Direct you to energy efficiency strategies and financial resources to make solarization affordable
- Calculate the environmental and financial benefits for your specific situation

 **ready?
set?
go solar!**
